PROFESSIONAL PROFILE

Data Scientist and AI Engineer with 12+ years of experience delivering end-to-end Machine Learning and Artificial Intelligence solutions across fintech, retail, consulting, and digital transformation. Extensive experience designing, deploying, and maintaining production ML systems, recommendation engines, predictive models, NLP applications, and AI-powered business automation. Strong background in Python, SQL, AWS, PySpark, MLOps, cloud computing, and modern LLM orchestration frameworks. Proven ability to lead cross-functional teams, mentor engineers, optimize business processes, and translate data into measurable business impact.

WORK EXPERIENCE

Exponential AI – AI Engineer Consultant (Nov 2023 – Present)

- Led AI transformation initiatives focused on automation, productivity improvement, and AI assistants for SMB clients. Key Achievements.
- Delivered AI automation solutions including ERP, POS, and AI Assistants, generating 15% productivity improvements measured through operational income vs. expense ratios.
- Designed a proprietary productivity measurement framework (OPEX vs Revenue) to quantify operational efficiency.
- Successfully delivered 11 concurrent AI implementation projects with high client satisfaction.
- Led multidisciplinary teams implementing scalable AI solutions that reduced manual operations and improved business performance.

Technologies AWS • Python • GitHub • AI Assistants • Automation

Mercado Libre – Machine Learning Data Engineer (Nov 2022 - Nov 2023)

- Maintained and optimized production ML systems contributing to a 3% increase in Gross Merchandise Value (GMV).
- Resolved critical production vulnerabilities ensuring high availability of recommendation services.
- Deployed 4 recommendation models into production reducing recommendation error by 10%.
- Improved technical documentation and engineering standards across the team.
- Participated in Mercado Libre Datathon developing a ChatGPT-based Sales Assistant, finishing among the **Top 20 of 100 teams**.

Technologies AWS • Python • GitHub • Machine Learning • Recommendation Systems

Aval Digital Labs – Senior Data Scientist (Nov 2019 – Nov 2022)

- Led multiple end-to-end Data Science initiatives resulting in promotion to Senior Data Scientist.
- Designed and developed **3 production data products**.
- Mentored **5 junior data scientists** and designed technical evaluation processes.
- Developed, trained, and deployed **25 XGBoost models** generating an estimated **USD 814K** in projected profit over three years.

Technologies Amazon SageMaker • Python • PyTorch • XGBoost

Davivienda Bank – Data Scientist (Nov 2018 - Nov 2019)

- Built Computer Vision algorithms extracting structured information from tax return images, increasing accuracy from **89% to 96%**.
- Developed customer segmentation models increasing digital adoption by **5%**.
- Implemented Computer Vision and Unsupervised Learning solutions reducing office operational costs by **8%**.

Technologies SQL • Power BI • OpenCV • Machine Learning

Legalmetrica – Research Consultant (Oct 2016 - Feb 2018)

- Designed NLP-based AI decision-support systems for electric utility companies.
- Developed data mining methodologies for financial contract valuation using healthcare databases.
- Supported financial evaluation projects involving Game Theory, Machine Learning, and predictive analytics contributing to successful multi-billion-dollar public bids.

Technologies Python • NLP • SQL • Machine Learning

EDUCATION

National University of Colombia – (Aug 2010 – Aug 2016)

Bachelor's Degree in Mathematics

LANGUAGES

- **Spanish** - Native (C2) - **English** - Professional Working Proficiency (B2)
