

JUAN FRANCO

Data Engineer | Azure Databricks | Medallion Architecture | Semantic Modeling
Panama City, Panama | juan.franco.job@gmail.com | +507 6934-2834 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and operating end-to-end data pipelines on Azure Databricks, applying the Medallion architecture (Bronze/Silver/Gold) to deliver clean, governed datasets that power BI dashboards and AI/ML models. Strong foundation in ETL/ELT development, semantic data modeling, and data warehouse design, combined with disciplined engineering practices including Git-based version control, code reviews, and CI/CD for data workflows. Skilled at partnering with analytics, data science, and business stakeholders to translate requirements into reliable, scalable, production-grade data products across multiple regions.

TECHNICAL SKILLS

Cloud & Big Data: Azure Databricks, Delta Lake, Apache Spark (PySpark, Spark SQL), Azure Data Lake Storage (ADLS Gen2), Medallion Architecture (Bronze/Silver/Gold)

Data Modeling: Dimensional Modeling (Star/Snowflake schemas), Semantic Models, Data Warehouse Design, Slowly Changing Dimensions, ETL/ELT Pipeline Development

Programming & Databases: Python (pandas, PySpark), SQL (advanced), Snowflake, T-SQL

Orchestration & DevOps: Databricks Workflows, Azure Data Factory, Git (branching, PRs, code review), CI/CD for data pipelines, Reproducible Environments

BI & Downstream Consumption: Power BI (semantic models, DAX, Row-Level Security), SAP Analytics Cloud, dashboards and AI/ML model feature stores

Professional: Stakeholder Management, Cross-functional Collaboration, Data Storytelling, Agile/Scrum, Mentoring

PROFESSIONAL EXPERIENCE

The Estée Lauder Companies Inc. — Panama City, Panama

Sep 2025 – Present

Business Intelligence & Analytics Analyst

- Designed and deployed automated multi-region ETL pipelines on Azure Databricks consolidating sales data across North America, LATAM, Asia, and EUKEM, eliminating ~12 hours/week of manual processing and establishing a single source of truth for commercial performance.
- Implemented the Medallion architecture (Bronze/Silver/Gold) on Delta Lake to standardize ingestion, cleansing, and serving layers, feeding curated Gold tables into Power BI semantic models and downstream AI/ML use cases.
- Built and maintained Power BI semantic models on top of the Gold layer (DAX measures, relationships, RLS), with dashboards adopted by 300+ commercial and operations stakeholders across four regions.
- Adopted Git-based workflows (feature branches, pull requests, peer code review) for notebooks and SQL transformations, improving release reliability and enabling reproducible deployments.

The Estée Lauder Companies Inc. — Panama City, Panama

Nov 2024 – Sep 2025

Strategy Delivery Hub Intern

- Built scalable data pipelines on Azure Databricks ingesting gigabytes of historical sales data, transforming them through Bronze → Silver → Gold layers to serve both analytics dashboards and a downstream demand forecasting model.
- Designed semantic models and dimensional schemas (star schema) on top of the Gold layer, enabling granular country- and product-level slicing for inventory planning and supply chain decisions.
- Contributed to data warehouse rearchitecture and Delta table optimization (partitioning, Z-ordering), cutting query times on key commercial tables by ~40% and improving accessibility for downstream consumers.

GITTS — Panama

Jan 2023 – Sep 2024

Machine Learning Research Assistant

- Built data ingestion and preprocessing pipelines in Python feeding multiple supervised learning experiments, including dataset versioning and reproducible feature engineering workflows.
- Developed an internal experimentation toolkit (preprocessing, training, evaluation, reporting) reused across 5+ research projects within the group, reducing setup time for new experiments by ~60%.

EDUCATION

Universidad Tecnológica de Panamá — Panama

Mar 2020 – May 2026

Bachelor of Engineering, Information Systems

Illinois Institute of Technology — Chicago, IL, USA

Jun 2024 – Jul 2024

Internship Program — Computer Science

Languages: Spanish (Native) | English (Professional Proficiency — Fluent)
