

Kevin Danilo Serrano

Abril

DATA ENGINEER

CONTACT

(+57) 3118478572

kdserranoa@unal.edu.co

SKILLS

- Azure, ADF, databricks
- GCP, AWS
- Python, pyspark, R
- SQL, NoSQL
- Power BI, Tableau, Shiny

EDUCATION

- **Master en Business Analytics & Big Data**
Universidad Camilo Jose Cela
2019-2020
- **Statistician**
Universidad Nacional
2010-2017

ABOUT ME

I am a Senior Data Engineer with 7+ years in data engineering and analytics. I specialize in ETL design, data warehouse migration, and predictive modeling using machine learning, with expertise in Databricks, Azure, and Power BI.

I thrive in collaborative settings and manage projects using agile methodologies. My strong analytical skills and strategic approach drive innovative solutions and continuous improvement.

WORK EXPERIENCE

- **Data Technical Lead**

BPT December 2025 - Present

- Defined and implemented reference architectures, data engineering standards, and reusable frameworks on Azure/Databricks to accelerate delivery, improve maintainability, and reduce operational risk.

- Led technical reviews and guided engineers through complex problem-solving, optimizing pipelines for performance and cost while improving observability and SLA compliance.

Technologies Used: Azure, ADF, ADB, Pyspark, SQL, Power BI

- **Head of data engineering**

TuBoleta June 2025 - December 2025

- Led the end-to-end migration of the company's data infrastructure to Azure, redefining the data model to enhance scalability and performance.

- Managed and mentored a team of data engineers, setting development standards, streamlining workflows, and aligning data initiatives with business objectives.

Technologies Used: Azure, ADF, ADB, Pyspark, SQL, Power BI

- **Senior Data Engineer**

TuBoleta August 2023 - June 2025

- Migrated a datawarehouse from Oracle to Azure under a new data model

- Built ETL pipelines to centralize cleaned data and visualize it in reports

- Authored a strategic acquisition of Databricks to improve data flow processes by +60%

- Developed segmentation and predictive models based on machine learning techniques

Technologies Used: Azure, ADF, ADB, Pyspark, SQL, Power BI

EDUCATION

- **Claude 101 Certificate of Completion**
Anthropic - 2026
- **Curso Profesional de Scrum**
Platzi - 2025
- **Databricks Fundamentals Accreditation**
Databricks - 2025
- **Diplomado en dirección de personal**
Politécnico Superior de Colombia - 2024
- **Analítica de datos y big data**
CYMETRIA - 2023
- **Blockchain y analítica de datos**
MINTIC - 2021

PROFESSIONAL SKILLS

- SQL and NOSQL database management
- Statistical analysis
- Data visualization
- SCRUM
- Machine learning

- **Data engineer**

BPT Software Sep 2022 - Aug 2023

- Avianca: development of ETLs, construction of dashboards in power BI, management reports with process results.

- Addi: Development of ETLs, management of Azure SQL database construction requirements

Technologies Used: Azure, ADF, ADB, Pyspark, SQL, Power BI

- **Data engineer**

NTT DATA

Feb 2022 - Sep 2022

- Reception of requests with POs

- Management of agile methodologies

- Development of ETL's for different clients

Technologies Used: Azure, ADF, ADB, Pyspark, R, Python, SQL

- **Data Scientist**

Mectronics S. A

Mar 2021 - Dec 2021

- Transmilenio: ETLs requirement, developed with databricks and R. Dashboards in Power BI and Tableau

Technologies Used: Azure, ADF, ADB, Pyspark, R, NoSQL, Tableau

- **Statistics Specialist**

Banco Davivienda

Sep 2020 - Mar 2021

- Using OCR services on AWS to evaluate authenticity in documents.

- Development of risk models

Technologies Used: AWS, S3, Dataiku, R, Python, SQL

- **Data Coordinator**

Emermedica Oficial

Mar 2020 - Jun 2020

- Coordinate the delivery of statistical reports to management

- Develop COVID prediction model to evaluate resources

Technologies Used: Knime, R

- **Statistician**

Compensar

Oct 2018 - Mar 2020

- Development of predictive models for marketing, segmentations

- Development of boards in tableau, to make decisions

Technologies Used: Alteryx, Knime, R, Shiny, Python, SQL

- **Data Analyst**

Banco de las Microfinanzas - Bancamia S.A.

Nov 2017 - Oct 2018

- Development of analytical models for customer segmentation.

- Time series for prediction of macroeconomic indicators

Technologies Used: R, Shiny, Python, SQL
