PROFILE

Productivity and Quality Engineer with over four years of experience in sourcing, data analysis, and process optimization. I have a strong background in developing reports and KPIs that enable data-driven decision-making and support continuous improvement strategies.

I am highly skilled in ERP systems such as SAP and SIESA, advanced Excel, and business intelligence tools including Qlik and Looker Studio. I excel at translating business requirements into quantitative insights, ensuring efficiency, accuracy, and reliability of information. Additionally, I have foundational knowledge of SQL and Python to enhance analytical capabilities.

I hold an intermediate English level (B2) and adapt easily to collaborative, dynamic, and results-oriented environments.

WORK EXPERIENCE

VENDOR MASTER DATA ANALYST

AMRIZE BSC (HOLCIM ABS) | September 2024 - Present

Analysis, cleansing, and migration of databases, ensuring data quality, integrity, and consistency. Design, development, and maintenance of dashboards in Qlik and Looker, focused on monitoring key performance indicators and supporting process optimization initiatives.

End-to-end management of supplier creation and administration processes, including the implementation of new platforms and user training. Active participation in supplier prequalification processes, ensuring compliance with internal policies while improving efficiency in data governance and systems management.

BUYER

CORONA ORGANIZATION SAS | March 2024 - September 2024

Support multiple purchasing categories by managing purchase order requests for the company's international plants, ensuring alignment with negotiation types and compliance with internal policies, contracts, and advance payment requirements when applicable. Additionally, monitor supplier deliveries and service execution to ensure timely and accurate fulfillment.

PURCHASING ANALYST

KARIBIK SAS | November 2022 - March 2024

Responsible for purchasing supplies, fabrics, and additional requirements to meet the supply chain needs and ensure continuous process improvement through inventory management, forecasting, budgeting, supplier evaluation, performance indicators, and support in import processes.

MANAGEMENT LEADER

LAP USA Corp | June 2020 - November 2022

Led the development of the company's logistics operations and team, conducted service provider evaluations, as well as created strategic alliances, developed job profiles and function manuals, and created and implemented instructions.
