

Santiago Henao U.

ANALYTICS | CORE BANKING & IMPLEMENTATION PROJECTS

Data Strategy professional with 8+ years of experience leveraging analytics, product thinking, and operational insights to solve complex business problems across fintech, retail, banking, e-commerce, and SaaS. Strong foundation in consulting and consumer insights from Nielsen, complemented by roles in high-growth startups (Merqueo, La Haus, Simetrik) and leading tech-driven organizations (Mercado Libre, Banco Falabella, Nu). Skilled at bridging business and technical teams, defining KPI frameworks, correcting data quality issues, and translating complex analysis into actionable recommendations that drive product, policy, and operational impact.

Work experience

Senior Business Analyst, Global Core Banking NU | 2025 - 2026

- Led hypothesis-driven performance analyses to evaluate policy changes and portfolio strategies across risk and product domains.
- Collaborated in process improvement initiatives impacting financial controls and reporting accuracy.
- Participated in core banking performance validation ensuring alignment between operational data and financial reporting structures.
- Delivered structured, insight-driven recommendations to senior stakeholders, influencing product and business decisions.
- Acted as strategic liaison between data, product, and business teams to align experimentation efforts with commercial objectives.

Analytics Lead Banco Falabella | 2022 - 2025

- Led cross-functional initiatives redesigning product origination workflows and testing operational improvements that enabled 12% resource efficiency gains.
- Designed and evaluated segmentation and targeting strategies across commercial channels, measuring impact on conversion and portfolio growth.
- Coordinated with Finance teams to ensure metric alignment and reporting consistency.
- Developed performance measurement frameworks to evaluate the effectiveness of commercial and operational interventions.
- Presented strategic recommendations backed by data experimentation to senior leadership.

Data & Analytics Engineer Mercado Libre | 2021 - 2022

- Supported commercial experimentation initiatives by building dashboards to track performance of pricing and operational strategies.
- Partnered with business teams to define success metrics and evaluate initiative outcomes.
- Ensured data accuracy and metric consistency to enable reliable decision-making in fast-paced environments.

Market Intelligence Lead
La Haus | 2020 - 2021

- Conducted market and customer analyses to inform growth strategies and expansion decisions.
- Evaluated acquisition and product experiments using customer behavior data.
- Developed insight-driven business cases to support investment and go-to-market decisions.
- Presented structured recommendations to executive leadership.

Business Implementator
Simetrik | 2019 - 2020

- Managed B2B client engagements, diagnosing financial process inefficiencies and designing automation pilots.
- Led financial process diagnostics for enterprise clients, identifying reconciliation gaps and automation opportunities.
- Structured business requirements documentation (BRD) for financial workflow automation.
- Partnered with Business and Engineering teams to implement system improvements.
- Ensured transactional consistency between operational systems and financial records.

Product Manager
Merqueo | 2019

- Led multidisciplinary squads to automate and improve fulfillment and operational processes.
- Identified bottlenecks and defined product requirements based on operational analysis.
- Implemented technological improvements reducing errors and increasing process reliability.
- Managed agile ceremonies (Scrum) for backend, frontend, and QA teams.

Planning Analyst
Merqueo | 2018

- Built forecasting models to optimize supply chain processes (demand, inventory, picking, transportation).
- Defined KPI frameworks for Operations leadership (utilization, waste, capacity, fulfillment, delivery times, cost per order).
- Acted as liaison between operations, commercial, product, and technology teams to align strategic initiatives.

Retail Service Trainee
Nielsen | 2017

- Conducted consumer insights analysis for major retail clients, informing pricing, assortment, and promotional decisions.
- Evaluated seasonal performance and recommended category strategies based on sensitivity and trends.
- Strengthened analytical and consulting foundations through client-facing projects.
