PROFESSIONAL SUMMARY

Analytical professional with a Master's degree in Operations Research and Statistics and over 5 years of experience in financial and telecommunications environments. Proven track record at Bell Canada and Scotiabank leveraging Python, SQL, and Excel to validate production changes and model business impact. Expertise in translating complex data into financial insights and ROI assessments. Committed to driving operational efficiency through analytics and data-driven decision-making in the digital sector.

HIGHLIGHTS OF QUALIFICATIONS

- Financial impact modeling, ROI assessment, business case and design.
- Python (Data Analysis & Automation), SQL, Excel (Financial modeling, macros).
- Deep understanding of Telecom customer journeys, Churn analysis, and banking production environments.
- Agile (Scrum), Data Visualization, Statistical Modeling, and Bilingual (English/Spanish).

EXPERIENCE

Sales Specialist | Bell, Ottawa | September 2024 – Present

- Leveraging in-depth knowledge of Bell's digital ecosystem to identify value levers in mobile and home service solutions, aligning sales strategies with corporate KPIs.
- Analyzed customer pain points to simplify complex digital offerings, resulting in a 25% increase in cross-sold plans and improved retention rates.
- Tracked and reported local market trends to management, providing actionable feedback for the refinement of go-to-market strategies in the telecom sector.

Entrepreneur | Florencia, Colombia | May 2021 – July 2024

- Designed and implemented operational models that improved branch efficiency by 15%, achieving 85% of business objectives ahead of schedule.
- Managed P&L responsibilities, resource allocation, and budget spend, ensuring all initiatives generated a positive return on investment (ROI).

Business Analyst | Scotiabank, Remote | December 2021 – December 2022

- Developed and executed complex Python scripts to audit and validate production changes, ensuring technical implementations met business requirements and financial logic.
- Managed large datasets to perform exploratory analysis, identifying anomalies in production that could impact financial performance indicators.
- Partnered with business users to evaluate the effectiveness of implemented changes, translating technical data into clear reports for senior management decision-making.
- Reduced manual processing time by 30% through Python-based automation, allowing the team to focus on high-value analytical tasks.

Manager | El Universo del cacharro, Florencia, Colombia | May 2019 – April 2021

- Led the recovery of 70% of the overdue credit portfolio, directly strengthening the company's financial health and cash flow.
- Spearheaded the adoption of self-service channels and digital trends for over 350 customers, successfully reducing operational friction.
- Ensured 100% compliance with regulatory requirements through the implementation and management of an electronic billing system.
