

JUAN DAVID MARÍN GÓMEZ

DATA ANALYST | AERONAUTICAL ENGINEER | COMMERCIAL PILOT

PROFESSIONAL PROFILE

Data Analyst focused on operational and business analytics, with experience in asset management, process optimization, and performance indicator analysis. Skilled in transforming data into actionable insights that support strategic decision-making. Experienced in working with operational metrics, KPI monitoring, process automation, and project coordination. Strong analytical and critical thinking skills, with a continuous improvement mindset. Currently enhancing expertise in SQL, Python, Power BI, Advanced Excel, and data analytics.

 Bogotá, Colombia

EDUCATION

Master's Degree in Data Analytics and Intelligent Systems

Universidad Santo Tomás

Currently Enrolled (2nd Semester)

Commercial Pilot License

Aviator College of Aeronautical Sciences & Technologies

2019-2023

Aeronautical Engineering

Universidad Pontificia Bolivariana

Graduated in 2019

LANGUAGES

Spanish: Native Speaker

English: Advanced Professional Proficiency (ICAO Level 5)

TECHNICAL SKILLS

- SQL
- Power BI
- Advanced Excel
- Python (Pandas, NumPy, Matplotlib)
- Google Sheets
- Dashboard Development
- Data Cleaning
- Data Visualization
- KPI Monitoring
- Business Intelligence
- Reporting & Analytics

PROFESSIONAL SKILLS

- Fast Learner
- Analytical Thinking
- Problem Solving
- Adaptability
- Project Management
- Teamwork
- Leadership
- Effective Communication
- Organization & Planning
- Results-Oriented Mindset

PROFESSIONAL EXPERIENCE

Business Intelligence & Data Analyst | Asurion

2025

- Analyze large volumes of operational and customer experience data to identify trends, patterns, and opportunities for improvement.
- Develop interactive dashboards and reports in Power BI to track key KPIs, including customer satisfaction, resolution times, service quality, and productivity.
- Extract, clean, and transform data from multiple sources (SQL, Excel, APIs) using Python (Pandas) to support advanced analysis and reporting.
- Create and optimize SQL queries to integrate and consolidate data from multiple systems and generate automated reports.
- Perform exploratory and statistical analyses to support strategic and operational decision-making.
- Identify actionable insights that improve processes, reduce response times, and enhance customer satisfaction.
- Collaborate with operations and product teams to design data-driven solutions and measure their business impact.

Operations & Data Analyst | Carmenza Gómez Vargas

January 2022 – Present

- Segregate, classify, and analyze historical data to identify valuable insights and reduce data noise.
- Develop data-driven models to support managerial and strategic decision-making.
- Monitor and analyze operational performance indicators for companies in the healthcare and agricultural sectors.
- Prepare executive reports and analytical summaries to support business decisions.
- Identify optimization opportunities that contribute to improved operational efficiency and resource utilization.
- Track and manage organizational assets through financial and operational data analysis.
- Develop and standardize processes to improve data quality, consistency, and availability.
- Manage multiple projects using performance metrics, KPI tracking, and results-based monitoring.

Aeronautical Engineering Intern | Avianca

January 2019 – June 2019

- Analyzed maintenance, repair, and overhaul (MRO) data related to repair times and operational costs.
- Developed and monitored performance indicators to evaluate aircraft maintenance processes.
- Identified process improvement opportunities through statistical and operational analysis.
- Participated in automation initiatives for data collection, integration, and consolidation.
- Prepared technical reports to support operational and engineering decision-making.
- Designed a data integration system using fuzzy logic techniques to maximize the value and usability of technical information.
