PROFESSIONAL SUMMARY

Data & Cloud Engineer with 2+ years of experience designing and operating production-grade data pipelines and cloud infrastructure on GCP and AWS. Proven track record building reusable, IaC-managed platform components—architected once, deployed across ten-plus use cases. Strong background in orchestrating end-to-end ETL workflows (Airflow, Spark, Databricks), provisioning cloud resources via Terraform, and containerizing workloads on Kubernetes and Cloud Run. AWS Academy certified. Cybersecurity background adds a DevSecOps lens to every architecture decision.

TECHNICAL SKILLS

Cloud — GCP: Cloud Run · Cloud Functions · Cloud Build · Cloud SQL · Cloud Memorystore · Cloud Storage · Cloud Pub/Sub · BigQuery · Datastream · Data Fusion · Looker · Looker Studio · VPC · VPN · Conversational Agents · IAM

Cloud — AWS: EC2 · ECS · ECR · Lambda · S3 · SNS · SQS · CloudWatch · CodeDeploy · VPC · IAM

Data Engineering: Apache Airflow · Apache Spark · Polars · Python · BigQuery · dbt (familiar) · GCS · AWS Glue (conceptual) · ETL/ELT pipeline design

Infrastructure & DevOps: Terraform · Kubernetes (K8s) · Docker · Hatchet · GitHub Actions · CI/CD · IaC best practices

Languages & Frameworks: Python · Golang · TypeScript · JavaScript · FastAPI · Django · Go Gin · NestJS · NextJS

Databases: PostgreSQL · MySQL · MongoDB · BigQuery · Oracle DB · SQL Server

Observability & Security: Cloud Monitoring · CloudWatch · Burp Suite · OWASP ZAP · Snyk · DevSecOps

PROFESSIONAL EXPERIENCE

Edupan S.A.

Staff Software & Data Engineer

March 2023 – Present

Panama City, Panama (Hybrid)

- Designed and maintained reusable GCP data platform modules (Cloud Run, Cloud Functions, Cloud Pub/Sub, BigQuery, Cloud Storage) via Terraform, enabling 10+ independent use cases from a single infrastructure codebase—directly embodying the team's differentiator of building infrastructure once, deploying many times.
- Built data pipelines modernising legacy ETL workflows using Apache Airflow for orchestration, Apache Spark and Polars for distributed and in-memory transformations, and Python for custom

ingestion logic—cutting processing time significantly by replacing outdated tooling with a composable, reusable stack.

- Provisioned and managed multi-environment GCP and AWS infrastructure with Terraform, enforcing IaC culture and eliminating configuration drift across dev, staging, and production.
- Architected microservices on Cloud Run and AWS ECS/ECR with CI/CD pipelines (Cloud Build, GitHub Actions, AWS CodeDeploy), achieving zero-downtime deployments.
- Leveraged Cloud Pub/Sub (GCP) and SNS/SQS (AWS) to build reliable alerting and notification systems across multiple production services, ensuring timely observability and incident response.
- Integrated Looker and Looker Studio dashboards directly on top of BigQuery, delivering self-service analytics to non-technical stakeholders.
- Applied DevSecOps practices (Snyk, OWASP ZAP, Burp Suite) to all cloud deployments, keeping OWASP Top-10 findings at zero throughout 2024–2025.
- Led a 4-person distributed engineering squad using agile ceremonies, maintaining on-time delivery across all major milestones.

EDUCATION

Technological University of Panama (UTP)

2021 – Present

Bachelor of Science in Cybersecurity

Relevant coursework: Cloud Security, Network Architecture, Cryptography, Digital Forensics, Secure Software Development

CERTIFICATIONS

AWS Academy Graduate — Cloud Foundations 2023

AWS Academy Graduate — Cloud Security Foundations 2023

AWS Academy Graduate — Cloud Developments 2023

AWS Certified Solutions Architect — Associate (In Progress) 2025 – Present

HONORS & COMPETITIONS

OAS Cyber Challenge — Mexico

2022

Competitor · Regional Hackathon (Top 4 in Panama)

Mexico City, Mexico

- Competed in cloud infrastructure (AWS) and web application penetration testing challenges, placing in the top 4 nationally through the OAS Creating a Path in Cybersecurity program.

OAS Cyber Challenge — Chile

2023

Competitor · Regional Hackathon

Santiago, Chile

- Focused on malware analysis and web application vulnerability assessment via Hackrocks CTF format.
