EXPERIENCE

Ernst & Young, Panama City, Panama

July 2021 to Present

IT Consultant ▪ LATAM North

Guides cross-functional teams in delivering payment modernization and digital transformation initiatives for financial institutions across Latin America. Leads end-to-end implementation efforts, partnering with business, technology and executive stakeholders to deliver complex enterprise solutions while supporting business development initiatives.

- Led a regional technology assessment evaluating applications, processes, and infrastructure, delivering a 3-year modernization roadmap aligned with business strategy and digital transformation objectives.
- Presented executive recommendations supporting approximately USD \$25M in prioritized modernization initiatives, including implementation roadmap, timelines, investment planning, and delivery strategy.
- Led the implementation of a new acquiring core and eCommerce platform while coordinating the migration of a card portfolio to a SaaS payment platform across a multidisciplinary team of 25 professionals.
- Advises financial institutions on payment modernization, core banking, digital platforms, enterprise architecture, and implementation strategies across Central America and Latin America.
- Designed and developed AI-powered knowledge assistants for enterprise software support, enabling contextual Q&A and accelerating knowledge retrieval for consulting teams and clients.
- Built AI-driven solutions to automate proposal development, PowerPoint generation, documentation, and internal consulting workflows using Microsoft Copilot, ChatGPT, Claude, prompt engineering, and lightweight HTML/JavaScript tools.

BANESCO PANAMÁ, Panama City, Panama

Sep 2020 to July 2021

Configuration Leader, March 2020 to July 2021

Led the configuration and delivery of Banesco's migration to the European WAY4 payment platform.

- Led 10 IT professionals within a global delivery team of 50 specialists across Europe, India, Venezuela, and Panama.
- Successfully migrated more than 120,000 cardholders, improving transaction processing by 10% while reducing operational costs by 25%.
- Designed the migration runbook, certification strategy, and reconciliation process, achieving over 99% reconciliation accuracy during production migration.
- Coordinated technical, security, operational, and financial readiness throughout the migration lifecycle, ensuring successful delivery and SLA compliance.

Configuration Specialist, September 2019 to March 2020

Led the implementation of customer-facing payment functionalities within the WAY4 platform while improving delivery practices and testing strategy.

- Delivered payment capabilities including dynamic transaction alerts, loyalty programs, recurring payments, installment plans, fraud detection enhancements, and credit management functionalities.
- Introduced Agile methodologies together with Jira and Confluence, improving collaboration, documentation, and SDLC governance.
- Designed and led the end-to-end testing strategy covering functional, regression, stress, and certification testing to ensure production readiness.
- Promoted technology improvements and innovation initiatives supporting continuous enhancement of the payment platform.

OUTSOURCE SERVICES, Panama City, Panama

August 2017 to August 2019

Provided services to ensure secure and reliable network operations for regional clients.

IT Consultant

- Supported implementation and post-implementation services for networking infrastructure, VPNs, PBX systems, routers, switches, and mobile telecommunications solutions.
- Achieved 95% customer satisfaction while building long-term client relationships that generated repeat business and referrals.
