

Juan Camilo Sutachan Trujillo | Data Engineer

+57 3012289924 | mrhockatt@gmail.com | github.com/Mr-Hockatt

Professional Summary

Data-focused Mechatronics Engineer with 4 years of experience specializing in automation, data analysis, and business intelligence. Proficient in building scalable data solutions using Airflow, BigQuery, GCP, n8n, Python, and SQL. Proven track record of streamlining operations through Power Platform automation and enhancing decision-making with advanced AI-driven data visualization.

Technical Skills

- **Languages & Frameworks:** Python (Pandas, Numpy), SQL, C++, MATLAB .
- **Data Engineering & ETL:** Apache Airflow, Google BigQuery, MySQL, n8n .
- **Visualization & BI:** Power BI (DAX, Bookmarks, Measure Selectors) .
- **Cloud & DevOps:** GCP Monitoring, Azure DevOps (Boards), GitHub.
- **AI & Automation:** OpenAI ChatGPT, GitHub Copilot, Power Automate, Power Apps.
- **Engineering & Design:** SolidWorks, OnShape, Unity, Arduino .

Soft Skills

- **Leadership & Teaching:** Experienced in leading interdisciplinary teams and training staff on new technical implementations.
 - **Problem Solving:** Specialized in applying an AI-driven mindset to solve complex logic cases and data validation.
 - **Time Management:** Demonstrated ability to reduce process times by up to 97% through strategic automation.
 - **Independent Efficiency:** Capable of managing end-to-end developments with minimal supervision.
 - **Agile Methodologies:** Proficient in SCRUM processes, including sprint planning and retrospectives.
-

Career History

Data Engineer | SLB | Bogotá, Colombia *Apr 2024 – Mar 2026*

- Led data engineering initiatives for the Sales and Operations Planning (S&OP) team, fostering a culture of technical adoption by teaching implementations to team members.
- Utilizes **GitHub Copilot** and **ChatGPT** to generate precise logic and prompts for complex problem-solving.
- Developed automated data validation and table refresh workflows in Airflow, achieving a **95% reduction in manual processing time**.
- Boosted execution speed by 5x by implementing GCP Monitoring alerts for fail-safe production environments.
- Designed an SQL crawler to map repository source tables and created BigQuery logs for Power BI monitoring analytics.
- Optimized dashboard interactivity using complex Power BI visuals, including measure selector slicers.

Student Intern | SLB | Bogotá, Colombia *Aug 2023 – Jan 2024*

- Collaborated with HR and Payroll teams to automate repetitive processes, increasing overall team productivity.
- Streamlined email processing and data extraction via Microsoft Power Platform, resulting in a **5x increase in process speed**.
- Improved organizational visibility by 20% through exploratory data analysis and storytelling-driven Power BI dashboards.
- Automated ticket creation in Azure Boards using SCRUM methodologies, **saving 97% of administrative time**.

Data Engineer | CIMEX SA | Bogotá, Colombia *Oct 2017 – Jun 2018 | Jun 2022 – Aug 2022*

- Co-led the homologation and update of price lists to facilitate a seamless database migration to Oracle NetSuite.
- Developed Python scripts using **Pandas and Numpy** for automated data extraction and file handling, drastically reducing manual entry errors.
- Conducted exploratory data analysis using **Seaborn** to validate data integrity during migration.

Metrology Technician | CIMEX SA | Bogotá, Colombia *Jan 2018 – Aug 2019*

- Managed precision scanning and measurement of components using ZEISS CMMs and Calypso software for quality control reports.
- Represented the company as a technical speaker at the F-AIR 2019 aeronautics fair.

Education

- **Bachelor in Mechatronics Engineering** | Universidad Militar Nueva Granada | Graduated: 2023
- **Data Science for All** | Correlation One (Education Ministry Scholarship) | Completed: 2022
- **Introduction to Aerospace Engineering** | SAGAN Project | Completed: 2025

Personal Projects

- **Neural Network from Scratch:** Developed a Python-based neural network focusing on the mathematical implementation of backpropagation and activation functions.
- **Pick & Place Robotics Simulator:** Designed a multi-robot simulation using **Unity, C#, and CAD** (SolidWorks/OnShape) for forward kinematics control.
- **IMU+HandTrack Controlled Game:** Built a Python game interface utilizing **Arduino, C++, and Mediapipe** for gesture-based control.

Languages

- **Spanish:** Native
- **English:** Advanced (C1)
- **Dutch:** Basic
